SUMMARY

Product designer working on B2C and B2B products in E-commerce, EdTech and SaaS. I design interfaces as systems in Figma (components, variants, documented states) and hand them off dev-ready. Decisions start with research and end with metrics: interviews, usability testing, A/B testing and funnel analytics. Recent results: checkout conversion from 62.4% to 69.8%, course completion from 31.6% to 42.3%.

EXPERIENCE

Freelance · Product Designer (UX/UI)

Apr 2025 - Present

Project-based work for early-stage startups · Remote · Landing pages, websites and apps

- End-to-end on every project: research, user flows, high-fidelity UI, design system and developer hand-off.
- North Star (EdTech): course platform: student dashboard, modules, video breakdowns, live demos.
- Lookmerce (AI, e-commerce): landing page and an AI service turning garment photos into listings.
- Blok B (B2B IT studio): landing page with UX copy, information architecture and a project brief form.
- Code and ship sites myself with Claude Code & Codex: a landing page from mockup to live in 2–3 days.

Astralis · Product Designer (Contract)

Sep 2025 - Dec 2025

SaaS startup, invite-only SEO platform · Remote · Worked with a PM and developers

- Redesigned the marketing landing page: main CTA click-through rate (landing visits → clicks) grew from 4.6% to 7.1%, CTA-to-invite-request conversion from 21.7% to 24.3%.
- Built a 35-component UI kit (80+ variants, auto-layout, documented states) covering 12+ sections on desktop and mobile; released after 2–3 rounds of design QA with developers, with no one-off styles.
- Designed 3 interactive dashboard demos inside the landing (analytics, recommendations, results) so visitors could try the product before signing up.

Fruit & Vegetable · Product Designer

Sep 2023 - Apr 2025

International produce delivery app (B2C) · Remote · With a senior designer, a PM, developers and an SEO specialist

- Redesigned checkout from 9 steps to 5 after 8+ interviews, 10+ usability tests and a survey with 30+ responses: checkout conversion (cart → placed order) rose from 62.4% to 69.8%, address errors fell from 8.7% to 4.1%, median completion time from 3:42 to 2:51, tracked for 4 weeks after launch.
- Proposed making the saved address the default path instead of a full form, and reworked the address fields with clear required markers and inline validation; the address step had produced most checkout errors.
- Ran an A/B test on delivery selection (time slots first, delivery price shown in each option): conversion rose from 5.2% to 6.0%, with no change in cancellations (2.8% vs 2.7%) or average order value (~\$31).
- Designed 50+ screens across 8 core flows, from catalog and search to checkout and delivery.

- Found a sharp drop-off after module 3 (only 58% moved on to module 4) through 5+ interviews, 5+ usability tests and dashboard analytics, and made it the team's first priority.
- Split long lessons into shorter blocks, added a progress indicator and made the next step obvious: the module 3 → 4 transition rose from 58% to 71%, full course completion from 31.6% to 42.3%, average lesson time fell from 18 to 14 minutes.
- Designed 25+ screens across catalog, lessons, progress and personal account over 3 iterations; mentored 2 junior designers.

- Social and campaign creatives, presentation visuals and Tilda landing pages; print materials, corporate templates and brand guidelines.

SKILLS

Product design	End-to-end UX/UI, design systems and UI kits (tokens, variables, component documentation, naming conventions), interaction design, information architecture, responsive design, accessibility
Research & metrics	Interviews, usability testing, surveys, JTBD, CJM, A/B testing, funnel analytics (Google Analytics, Yandex Metrica)
Collaboration	Developer hand-off, design QA, mentoring
Tools	Figma, Framer, HTML/CSS, Notion, Photoshop, Illustrator
AI	Claude Code & Codex: coded prototypes, building and shipping landing pages, Figma via MCP; ComfyUI and Krea for visuals

EDUCATION

Synergy University, Moscow	2020 - 2024
Design and Advertising, Graphic Design	
St. Petersburg University of Management Technologies and Economics	2016 - 2020
Book Publishing	

ADDITIONAL

- Product design course at MAX Studio (taught by designers from Samokat, VkusVill and Yandex Eats); training at the Stieglitz Academy of Art and Design.
- Languages: English (professional working proficiency, B2), Russian (native).
- Background in book publishing and editing: I think in structure and write interface copy with care.
